1. Fire fighters use friction to control how fast they **fall**.
 2. It's friction that makes this wooden box stick to the table so it's hard to **push**.
 3. The force between the ramp and weight get smaller and smaller, and then the **weight slides down hill**.
 4. Friction is what keeps your bicycle from sliding out from under you as you go **around the corner**.
 5. It's your **finger prints** that let you hold onto smooth things, or pick up small slippery things.
 6. A **hovercraft** is a big boat that pushes air underneath it so that it floats on the water.
 7. **Basketball shoes** are made of rubber, and rubber has a lot of friction when it's going against the hardwood.
 8. **Skates** slide because they make a layer of liquid water between the metal blade and the ice.
 9. A world without friction would be **dangerous**.
 10. Since a **bowling ball** is round when you push it, it wants to roll. It's not sliding, and that lowers the friction.
 11. **Fish** are smooth and slippery so they can slide through the water, cutting the friction.
 12. Whales make **sound waves** so it can move.
